

HFP-SS90/160

Mechanical double arm rotating pendant gastroenterology pendant

Describe

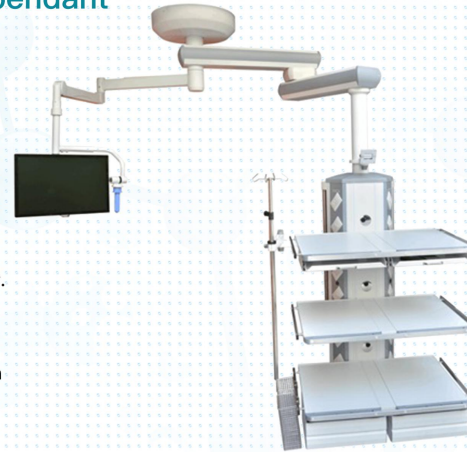

Applicable areas: operating room, emergency room, intensive care unit, recovery room. The installation adopts the ceiling hanging mode, which can rotate within 340° range, and accurately adjust the position of the terminal box. The height of the equipment enables the medical staff to raise their hands and be handy. The suspension tower cantilever is made of imported high-strength aluminum alloy by one-step extrusion, and the surface is treated with primary oxidation and rust prevention. Brake: optional friction brake or pneumatic brake.

Standard Configuration

- * 2 carbon dioxide (CO₂)
- * 1 air
- * 2 vacuum suction (VAC)
- * 1 nitrous oxide (N₂O)
- * 1 jet exhaust emission (AGSS)
- * 12 10A power outlets
- * 1 network socket
- * 1 grounding terminal

Annex

- * 2 pallets
- * 1 drawer
- * 1 infusion stand
